EDUCATION

CUNY Brooklyn College

May 2026

Bachelor of Science in Computer Science

Relevant Coursework: Data Structures, Analysis of Algorithms, Web Applications, Software Engineering, Database Systems, Systems Programming, Introduction to Software Engineering

CUNY Borough of Manhattan Community College

August 2022

Associates in Science in Psychology

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C++, SQL

Frameworks & Libraries: Next.js, React, Node.js, Express, FastAPI, Phaser 3, Tailwind CSS, Recharts

Tools & Platforms: Git, GitHub, Supabase, PostgreSQL, Google BigQuery, Looker Studio, Vercel, ChromaDB, REST APIs

AI & APIs: OpenAI GPT-4o-mini, Groq API, Google Gemini, LangChain, ElevenLabs TTS

WORK EXPERIENCE

Design Implementation Group — Furniture Buyer & Internal Tools Developer

June 2026 – Present

- Managing end-to-end procurement workflows for commercial interior design projects, coordinating across vendor, designer, and warehouse teams across multiple concurrent clinic installations.
- Designing a full-stack internal procurement tool to replace the existing Excel-based system, with role-based access control, real-time order tracking, vendor management, and warehouse confirmation workflows.

Sports Media Inc. — Software Engineer

October 2025

- Designed and deployed a Looker Studio dashboard connected to Google BigQuery, providing monthly performance summaries for over 2.7B in ticket revenue and 69M tickets sold across multiple sports teams.
- Developed and optimized SQL queries to clean, aggregate, and join datasets, improving data refresh time by ~40%.
- Collaborated with the marketing analytics team to identify key revenue drivers and streamline data pipelines, cutting reporting time by 80%.

iCAMP — Instructor

July 2024 – August 2025

- Aided in delivering lessons in game development using Scratch, helping teach foundational programming concepts to 20–40 campers.
- Guided campers in learning and creating 3D models with TinkerCAD, fostering technical and engineering skills.

Department of Education — Technician Intern

October 2023 – March 2024

- Provided technical support by troubleshooting of 50+ student and teacher computer systems, laptops, iPads, and printers, diagnosing and resolving issues to maintain operational efficiency.
- Conducted factory resets and OS reinstalls on 10+ laptops, optimizing performance and security standards.

Chinese Methodist Center — Technician Assistant

February 2023 – May 2023

- Utilized Google Suite to streamline administrative tasks, improving overall organizational efficiency.
 - Supported students and teachers through tutoring, technical assistance, and enhancing educational programs.
-

PROJECTS

SpeedReading App

Spring 2026

Next.js · Node.js/Express · Supabase · PostgreSQL · Groq API · TypeScript · Tailwind CSS · PWA · CISC 3171

- Built a full-stack Progressive Web App that trains users to read faster while maintaining comprehension, deployed to Vercel with a live production backend.
- Engineered a client-side RSVP (Rapid Serial Visual Presentation) reading engine with ORP (Optimal Recognition Point) highlighting and dynamic WPM speed control, running fully offline during active sessions.
- Integrated the Groq API to auto-generate multiple-choice comprehension quizzes after each reading session, with scores stored in Supabase and surfaced on a Recharts progress dashboard.
- Built a server-side PDF upload and processing pipeline using pdf-parse and AI-powered text cleanup, supporting drag-and-drop uploads and graceful handling of low-quality PDFs.
- Implemented guest and registered user flows with Supabase Auth (email/password + OAuth + anonymous sign-in) and Row-Level Security policies.

Beyond Barriers — Educational Accessibility Game

Spring 2026

Phaser 3 · JavaScript · Python · FastAPI · Google Gemini · LangChain · ChromaDB · ElevenLabs TTS · CISC 4900

- Developed a 2D educational platformer simulating campus navigation with a peripheral vision limitation, raising awareness of accessibility challenges for a senior capstone presentation.
- Built a RAG (Retrieval-Augmented Generation) pipeline using Google Gemini, LangChain, and ChromaDB to dynamically generate quiz questions from research PDFs, gating level progression.
- Integrated ElevenLabs TTS narration and a real-time anxiety meter mechanic to create an immersive, research-backed simulation of visual impairment.
- Presented at Brooklyn College CIS Day 2026, showcasing the project to faculty, industry attendees, and students.
- Collaborated across a Windows/Mac development environment, managing Git merge conflicts, Python virtual environments, and a modular Phaser scene architecture.

Brooklyn College CS Club Website — Club Connector

May 2025

TypeScript · Tailwind CSS · Open Source

- Built a live room-status feature for the e-board, improving student access to the club room by 20%.
- Launched a resources page centralizing tutoring and study materials, helping 900+ CS students find academic support.
- Developed and maintained the open-source club website, increasing site engagement for the computer science community.

LEADERSHIP & ACTIVITIES

Brooklyn College Computer Science Club — E-Board Member — Club Connector

2025 – 2026

- Serve on the executive board, managing communications and outreach to connect students with club resources, events, and opportunities.
- Volunteered at club-organized events and helped coordinate member engagement across the CS community.

Hack Brooklyn 2026 — Co-Organizer

April 2026

- Coordinated with faculty, department chairs, and administration to secure approval and support for a 100+ participant hackathon.
- Organized and managed a Discord server for 100+ participants, handled in-person logistics with sponsor support, and helped manage a \$10,000+ event budget.

Presenter — CIS Day 2026 | Brooklyn College Department of Computer & Information Science

- Presented the Beyond Barriers accessibility game to faculty, alumni, and students at the department's annual showcase.
